

ITS — Industrial Technology Solutions

CLIENT OUTREACH SCRIPTS & TEMPLATES

July 2026 | El Harrouch, Skikda

1. Cold Email — The 'Uptime' Pitch

Target: Plant Manager / Maintenance Director / Operations Manager

Subject: Eliminating vendor friction at [Company Name]

Dear [Mr./Ms. Last Name],

I'm [Your Name], Lead Engineer at ITS — Industrial Technology Solutions based in El Harrouch.

Most industrial facilities in the Skikda region currently manage electrical/automation work and mechanical/machine work through two separate contractors. This creates a persistent problem: when a breakdown happens, finger-pointing between vendors delays the fix, and production downtime stretches far longer than necessary.

ITS eliminates this friction entirely.

We combine electrical & electronics engineering with machine building & maintenance under one roof. One team. One invoice. Full accountability.

Here's what makes us different:

- Dual-discipline team — PLC programming, control panels, CNC fabrication, hydraulics — all in-house
- The Master Guarantee — I personally inspect every project before sign-off
- Rapid emergency response — flat dispatch fee + 1.5x hourly for urgent breakdowns
- SLA partnerships — preventive maintenance contracts that keep your equipment running

I'd like to offer you a free 30-minute diagnostic walkthrough of one piece of equipment at your facility. No obligation — just a demonstration of how we work.

Are you available for a 10-minute call this week?

Best regards,

[Your Name]

Lead Engineer — ITS Industrial Technology Solutions

2. LinkedIn Message

Bonjour [First Name],

I noticed you're the [Title] at [Company Name]. I'm reaching out because I see many facilities in Skikda managing electrical and mechanical maintenance through separate vendors — which creates delays and accountability gaps.

I founded ITS — Industrial Technology Solutions to solve exactly this. We handle both disciplines in-house: from PLC programming and control panels to CNC fabrication and hydraulics.

I'd love to connect and share how we help plants reduce unplanned downtime.

[Your Name]

ITS — Industrial Technology Solutions

3. Phone Script — 60 Seconds

YOU: "Good morning [Mr./Ms. Last Name], this is [Your Name] from ITS — Industrial Technology Solutions in El Harrouch. Do you have 30 seconds?"

[If yes, continue. If not, ask for a better time.]

YOU: "I won't take much of your time. We're a technical services company that combines electrical engineering and machine maintenance under one roof — so our clients don't need to manage two separate contractors.

Many plants in Skikda tell us their biggest frustration is coordinating electrical and mechanical vendors during breakdowns. We eliminate that completely.

I'm not asking you to commit to anything. I'd like to offer a free 15-minute walkthrough of one piece of equipment — just so you can see our quality standard.

Could I stop by [day/time] for a quick coffee and a conversation?"

[If interested → confirm visit. If hesitant → send the proposal PDF first.]

4. Follow-Up Email (3 Days After No Reply)

Subject: Quick follow-up — ITS / [Company Name]

Dear [Mr./Ms. Last Name],

I reached out a few days ago about how ITS can help [Company Name] reduce unplanned downtime by handling both electrical and mechanical maintenance under one accountable team.

I know you're busy — so I'll keep this brief.

We're a local Skikda-based team with:

- ✓ Electrical engineering (PLC, panels, wiring, diagnostics)
- ✓ Machine building (CNC, hydraulics, fabrication, retrofitting)
- ✓ The Master Guarantee — Lead Engineer sign-off on every job
- ✓ Emergency response — dispatch within hours, not days

Would 10 minutes next week work for a quick call?

Best regards,
[Your Name]

5. Supply Shop — In-Person Pitch

YOU: "Salam alikum. I'm [Your Name] from ITS — Industrial Technology Solutions."

[Hand them your card.]

YOU: "We're an industrial maintenance company doing electrical and mechanical work across the Skikda industrial zone. We buy a lot of parts — control components, sensors, mechanical fittings, hydraulic seals."

YOU: "I see you supply parts to factories around here. Here's what I'm offering:"

YOU: "If you share the names of 3 factories that frequently buy emergency replacement parts from you, I will buy ALL my future supplies from your shop. No exceptions."

[Wait for reaction.]

YOU: "When one of those leads converts into a paying client for us, I'll make your shop my exclusive

supplier for those categories."

YOU: "Deal?"

[If yes → get the names. If hesitant → leave a card and come back next week.]

6. Referral Ask — At Project Handover

YOU: "I'm glad we could get this system running reliably for you today. Everything has passed my final inspection — the Master Guarantee — so you're fully covered."

YOU: "Here are two of my cards."

[Hand two cards.]

YOU: "Are there any other departments or facilities you manage where we could help improve uptime? Or perhaps a colleague in your network who faces the same kinds of electrical-mechanical coordination issues?"

[If they name someone → ask for an introduction.]

YOU: "Would you be comfortable making a quick email intro? I'll take it from there."

[If hesitant → leave the card and say you'll follow up based on their lead.]
